Dear Sir/Mam,

It was with great interest that I read your recent post on LinkedIn for the position of Data Analyst.

Assessment of my credentials shall reaffirm my role as an enabler for meeting and exceeding the desired objectives through effective contributions. I possess **4.5 years** of qualitative experience. My forte lies in Business Analytics, Data Analytics & Governance, Predictive Modelling / Statistical Analysis, Requirement Gathering & Analysis, Software development processes & methodologies, Programming and scripting, besides others.

I was last associated with Rakuten Symphony; I believe my experience aligns well with the expectations of this role.

The select highlights mentioned below are indicative of the work that I have managed; my resume sets forth further details.
- Expertise in Data cleaning and wrangling in Python, SQL and data visualization on PowerBI and Tableau
- Proficient in utilizing advanced statistical techniques and programming languages such as Python and SQL
- Expertise in testing RESTful APIs and Databases using Postman and MySQL to validate functionality, completeness, data integrity, and reliability.
- A keen communicator with honed interpersonal, problem solving and analytical abilities

I am willing to join your organization due to its attributes and placement as a leader in the industry, great organizational culture, spirit of innovation and professionalism. I am driven to this role on account of the organizational performance, values and challenges that it offers.

I commend your efforts for taking time to review my credentials and experience; I thank you in advance for your consideration and would appreciate the opportunity to interview and look forward to hearing from you soon.

Thanking you,

Sincerely,

Ankita Soni
